***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a method for evaluating characteristics of the ion implantation in a shallow junction formed on a semiconductor sample, classified in class 356, subclass 369.
- II. Claims 5-10, drawn to a method of forming a shallow junction in a semiconductor wafer, classified in class 250, subclass 225.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for evaluating characteristics of the ion implantation in a shallow junction formed on a semiconductor sample. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Michael A Stallman on 7/7/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
